PROJECTS

My Portfolio   Github

Tech stack :**HTML | CSS**

- This portfolio project is a digital mirror which is reflecting my skills and creativity.
- The profile section introduces me as a protagonist, and as visitors scroll through the sections, they are immersed in my **journey**, **skills**, and **projects**.
- The portfolio truly shines in the Projects section,where visitors can have a quick glance of my **hosted project with Live Demo**.

Amazon-Clone   Github

Tech stack : **HTML | CSS**

- The **Amazon Clone project** provided me an **invaluable learning** experience. It allowed for the **enhancement of my skills** in the frontend development.
- This project focus on **replicating** the **visual style** and **layout** of the **Amazon website**.
- Worked on **layout design**, **navigation menus**, **image display**, and **linking between different pages**.

Myntra Clone Page   Github

Tech stack:**HTML | CSS | JAVASCRIPT**

- It is a **Team Project**.
- Collaborating with team members taught me how to work in team by **considering different viewpoints,adjusting to changes**.
- **I**t is completely functional
- **I**t works as similar as myntra original page where you can add items to cart and remove items from cart and get total payable amount
